DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, and 38-49 are drawn to a electronic device, classified in class 257, subclass 700.
- II. Claims 20-37 are drawn to a film body, classified in class 428, subclass 10+.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the film body doesn't need to be in an electronic device such as a passive device. The subcombination has separate utility such as the film body could be used in print making.
